

HSE Advisor

Badger Daylighting Corp is looking for an HSE Advisor for our manufacturing facility. Reporting to the Western Canada HSE Manager, the HSE Advisor will focus on enhancing and administering safety within a mid-size truck welding and assembly manufacturing environment.

Specific Duties

This position is responsible for enhancing and maintaining the Manufacturing Safety Program in compliance with current OH&S and provincial standards. The incumbent will develop, document, implement, and maintain a comprehensive safety program;

- Deliver a safety program in the manufacturing facility by anticipating, recognizing, evaluating, controlling and eliminating hazards
- Establish regular inspection schedules for the manufacturing facility with technical reports & recommendations for corrective actions
- Work with various departments on corrective action solutions
- Develop a strong Safety Committee
- Conduct required audits and ensure follow up and corrective actions are complete
- Complete shop inspections with operations personnel and enhance safety culture and safety presence on the shop floor
- Working with management; implement & educate training solutions that will help improve safety
- Conduct incident/accident investigations, analysis, root cause, preparation of reports; complete incident summaries and management follow up
- Interpret and apply health and safety codes, standards and regulations as it applies to operations
- Maintain technical proficiency in order to provide guidance on regulatory standards and industry best practice

Requirements

- Post-secondary degree or diploma in a related field with a minimum of 5 years of related industry experience with MHSA Safety Officer Certification or Canadian Registered Safety Professional (CRSP)
- Familiarity with OH&S provincial safety regulations, emergency procedures, WCB requirements with proven track record in a manufacturing facility
- Excellent communication skills
 - Leadership, Mentoring, Training
 - Ability to understand and moderate response to build trust and respect of staff.
- Hands-on experience in a manufacturing facility
- Able to work with department supervisors, team leaders, and managers effectively across several different functional areas in a collaborative environment
- Experience working in a manufacturing environment with steel and aluminum welding of medium and heavy piece-work, as well as electrical, paint shop and assembly operations.
- Self-directed, well-organized and able to handle multiple assignments
- Proficiency with Microsoft Office products
